

FNP Sales Performance Dashboard Analysis

Executive Summary

This project analyzes sales performance data for FNP (Ferns N Petals) using Microsoft Excel. The objective was to transform raw transactional data into actionable business insights through interactive dashboards, data modeling, and KPI tracking.

The dashboard provides visibility into revenue trends, customer purchasing behavior, product performance, occasion-based demand, and geographical sales distribution. By leveraging Power Query, Power Pivot, DAX Measures, and advanced Excel visualization techniques, the project delivers a centralized reporting solution for business decision-making.

Business Objectives

The project was designed to answer the following business questions:

- 1. What is the overall revenue generated by the business?
- 2. Which products and categories contribute the most revenue?
- 3. Which occasions drive the highest sales?
- 4. How does revenue vary across months and hours?
- 5. Which cities generate the highest order volumes?
- 6. What is the average customer spend and delivery performance?

Key Performance Indicators (KPIs)

KPI	Value
Total Orders	1,000
Total Revenue	₹35,20,984
Average Customer Spend	₹3,520.98
Average Delivery Time	5.53 Days

Analysis & Findings

Revenue Trend Analysis

Monthly revenue analysis reveals significant fluctuations throughout the year, indicating strong seasonality. Revenue spikes are observed during festival and gifting periods, suggesting that customer demand is heavily influenced by occasions and celebrations.

Business Impact

Seasonal demand forecasting can improve inventory planning and marketing effectiveness.

Occasion-Based Performance

Occasion analysis shows that sales are primarily driven by:

• Anniversary • Raksha Bandhan • Holi • Birthday • Valentine's Day

Business Impact

Occasion-focused marketing campaigns can significantly improve revenue generation.

Category Performance

Top-performing categories include:

1. Colors
2. Soft Toys
3. Sweets

These categories contribute a substantial share of total revenue.

Business Impact

Maintaining inventory availability for these categories can help maximize sales opportunities.

Product Performance

The highest revenue-generating products include:

• Magnum Set • Quia Gift • Dolores Gift • Harum Pack • Deserunt Box

Business Impact

Bundling and promoting top-performing products can increase average order value.

Geographic Analysis

Cities generating the highest order volumes include:

• Imphal • Dhanbad • Kavali • Haridwar • Bidhanagar

Business Impact

Regional marketing strategies can improve customer acquisition and retention in high-performing markets.

Recommendations

1. Increase promotional activities before major festivals and occasions.
 2. Optimize inventory planning based on seasonal demand patterns.
 3. Launch product bundles around top-selling products.
 4. Focus marketing investments on high-performing cities.
 5. Implement customer loyalty programs to increase repeat purchases.
 6. Monitor delivery performance to improve customer satisfaction.
-

Conclusion

The dashboard successfully transforms raw sales data into meaningful business insights. Through data modeling, KPI tracking, and interactive visualizations, stakeholders can monitor performance, identify growth opportunities, and make data-driven decisions.

The project demonstrates strong capabilities in data cleaning, modeling, analysis, and dashboard development using Microsoft Excel.
